WRITING CONTROL STRUCTURES

1. Write a program that will prompt for a EMPNO,ENAME,SAL. if EMPNO does not exists in EMP table then INSERT the EMPNO, ENAME, SAL into the EMP table else UPDATE ENAME, SAL for that EMPNO.

```
SQL> SET SERVEROUTPUT ON;
SQL>
SQL> DECLARE
  2   V_EMPNO EMP.EMPNO%TYPE := &EMPNO;
  3   V_ENAME EMP.ENAME%TYPE := 'AENAME';
  4   V_SAL EMP.SAL%TYPE := &SAL;
  5   CNT NUMBER;
  6 BEGIN
  7   SELECT COUNT(*)
  8   INTO CNT
  9   FROM EMP
 10   WHERE EMPNO = V_EMPNO;
 11
 12   IF CNT = 0 THEN
 13     INSERT INTO EMP(EMPNO, ENAME, SAL)
 14     VALUES(V_EMPNO, V_ENAME, V_SAL);
 15
 16     DBMS_OUTPUT.PUT_LINE('Employee Inserted');
 17   ELSE
 18     UPDATE EMP
 19     SET ENAME = V_ENAME,
 20     SAL = V_SAL
 21     WHERE EMPNO = V_EMPNO;
 22
 23     DBMS_OUTPUT.PUT_LINE('Employee Updated');
 24   END IF;
 25
 26   COMMIT;
 27 END;
 28 /
Enter value for empno: 7789
old 2:   V_EMPNO EMP.EMPNO%TYPE := &EMPNO;
new 2:   V_EMPNO EMP.EMPNO%TYPE := 7789;
Enter value for ename: VAISH
old 3:   V_ENAME EMP.ENAME%TYPE := 'AENAME';
new 3:   V_ENAME EMP.ENAME%TYPE := 'VAISH';
Enter value for sal: 50000
old 4:   V_SAL EMP.SAL%TYPE := &SAL;
new 4:   V_SAL EMP.SAL%TYPE := 50000;
Employee Updated
```

2. Write a program that will prompt for number and display whether the number is ODD or EVEN number.

```
SQL> SET SERVEROUTPUT ON;
SQL>
SQL> DECLARE
  2   NUM NUMBER := &NUM;
  3 BEGIN
  4   IF MOD(NUM,2)=0 THEN
  5     DBMS_OUTPUT.PUT_LINE(NUM || ' IS EVEN');
  6   ELSE
  7     DBMS_OUTPUT.PUT_LINE(NUM || ' IS ODD');
  8   END IF;
  9 END;
 10 /
Enter value for num: 11
old 2:   NUM NUMBER := &NUM;
new 2:   NUM NUMBER := 11;
11 IS ODD
PL/SQL procedure successfully completed.
```

DATE:24-07-2026

3. Write program that prompts for EMPNO and update his salary based on the below specification:

```
SQL> DECLARE
2   V_EMPNO EMP.EMPNO%TYPE := &EMPNO;
3   V_DEPTNO EMP.DEPTNO%TYPE;
4 BEGIN
5   SELECT DEPTNO
6   INTO V_DEPTNO
7   FROM EMP
8   WHERE EMPNO = V_EMPNO;
9
10  IF V_DEPTNO = 10 THEN
11    UPDATE EMP
12    SET SAL = SAL + (SAL*0.10)
13    WHERE EMPNO = V_EMPNO;
14    DBMS_OUTPUT.PUT_LINE('Salary Updated by 10%');
15
16  ELSEIF V_DEPTNO = 20 THEN
17    UPDATE EMP
18    SET SAL = SAL + (SAL*0.15)
19    WHERE EMPNO = V_EMPNO;
20    DBMS_OUTPUT.PUT_LINE('Salary Updated by 15%');
21
22  ELSE
23    UPDATE EMP
24    SET SAL = SAL + NVL(COMM,0)
25    WHERE EMPNO = V_EMPNO;
26    DBMS_OUTPUT.PUT_LINE('Salary Updated with COMM');
27  END IF;
28  COMMIT;
29 END;
30 /
Enter value for empno: 7369
old 2:   V_EMPNO EMP.EMPNO%TYPE := &EMPNO;
new 2:   V_EMPNO EMP.EMPNO%TYPE := 7369;
Salary Updated by 15%
PL/SQL procedure successfully completed.
```

4. In sql Prompt create a table MYTABLE1 with RESULT as a column of number datatype.

Write a program that will insert record in the mytable from 1,2,3,..... to 10 values.

Do not Insert record 6 and 8.

```
SQL> CREATE TABLE MYTABLE1
2 (
3   RESULT NUMBER
4 );
Table created.
SQL> SET SERVEROUTPUT ON;
SQL> DECLARE
2   I NUMBER := 1;
3 BEGIN
4   WHILE I <= 10 LOOP
5
6     IF I <> 6 AND I <> 8 THEN
7       INSERT INTO MYTABLE1
8       VALUES(I);
9     END IF;
10    I := I + 1;
11  END LOOP;
12  COMMIT;
13
14  DBMS_OUTPUT.PUT_LINE('Records Inserted Successfully');
15 END;
16 /
Records Inserted Successfully
PL/SQL procedure successfully completed.
SQL> SELECT * FROM MYTABLE1;

```

RESULT
1
2
3
4
5
7

DATE:24-07-2026

```
SQL> SELECT * FROM MYTABLE1;
```

RESULT

1
2
3
4
5
7
9
18

8 rows selected.
